DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4, 6-10, drawn to method and apparatus for chromatography, classified in class 210, subclass 656.
- II. Claims 5, 16-49, drawn to a separation device, classified in class 210, subclass 634.
- III. Claims 11-12, 15, drawn to electrophoresis method and apparatus, classified in class 204, subclass 450.
- IV. Claims 13-14, drawn to membrane separation, classified in class 210, subclass 652.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II, III, IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1741

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III, IV, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
